Code of Practice for Disability Equipment, Wheelchair & Seating Services (UK)

This book is the only comprehensive guide available for disability equipment, wheelchair and seating services in the UK and is essential reading for everyone associated with these services. It is the official publication of CECOPS independent standards body. It sets down a quality framework for procurement and provision of services, allowing high quality, efficient and safe services to be delivered.

"HSE recognises the need for guidance, and welcomes the code of practice... The code will help organisations who commission or provide equipment make health and safety improvements in their businesses."

Health and Safety Executive

The *Code of Practice for Disability Equipment, Wheelchair and Seating Services* is an indispensable guide for: policy makers; GPs; commissioners; procurement officers; service users and carers; healthcare professionals; medical device technicians and trainers; regulators and auditors; students and academics; and all providers including equipment stores, retailers, special schools, care homes, hospitals and third sector organisations.

This Code of Practice sets a national (UK), and perhaps international, benchmark against which services can be measured, as well as a realistic level of service people should expect to receive.

"However optimistic and committed governments and organisations are to improving outcomes for disabled people, practical steps are required to make these improvements; I believe this Code lays down steps that need to be taken. Let's just hope it is followed!" **The Baroness Grey-Thompson DBE, DL**
